

1. Organisation Overview

Name of the organisation

- 🍪 The targeted business that I will be creating a website for is a small local bakery called **Heart and Crumb.** ❤️

Brief History of the organisation

- 🍪 This bakery was established in the 1990s to provide fresh homemade baked goods to people around the local community. The bakery strictly used ingredients that were farmed and foraged. It began as a small family business and grew through the traditional recipes they provide.

Mission

- 🍪 Turning a simple scratch-made ingredient to ensure that every crust tells a story and every crumb makes a way to your heart and feels like home.

Vision

- 🍪 To be the beloved heart of the community, craft authentic bakes that bring people together through a shared love of simple food.

Target Audience

- 🍪 The target audience at first was the local neighborhood families and students
- 🍪 People who want baked products for birthdays, weddings and other celebrations and events.

2. Website Goals and Objectives

Website goals

- 🍪 The website will provide customers from local and non-local neighborhoods with an easy way to view available products, prices and contact the bakery.

Key Performance Indicators

- 🍪 Sales and Revenues- track monthly sales to measure business growth and profitability.

🍪 customer satisfaction- monitor customer feedback and the number of customers that return.

🍪 Website performance – Track website visitors, online enquiries and orders to measure the success of the website.

3. Current Website Analysis

Analyse the strengths and weaknesses of the existing website

🍪 The business does not have website they only use facebook and WhatsApp for any interaction with the customers and to take orders

Platform	Strengths	Weakness
Facebook	Helps the bakery reach many local customers	Customers may struggle to find all the bakery updated information in one place and on time.
WhatsApp	WhatsApp allows quick and direct communication with customers	The product information, prices and services may not be professionally organized.

Areas for improvement based on the weaknesses of using social media platforms

🍪 A website would provide one central place where customers can view Heart and Crumb bakery's products, prices history, contact details and services. It gives the bakery a more professional online presence and makes it easier for new customers to find the business through search engines

4. Proposed Website Features and Functionalities.

The website will contain features that are functional like:

📄 **Homepage-** Introduce Heart and Crumb bakery its history and most preferred products.

📄 **Products and prices-** Display the bakery's specialties with description and prices.

📄 **Gallery-** attractive photos of the bakery and its products.

📄 **Online Enquiry of Form-** Allow customers to enquire about products or place orders online.

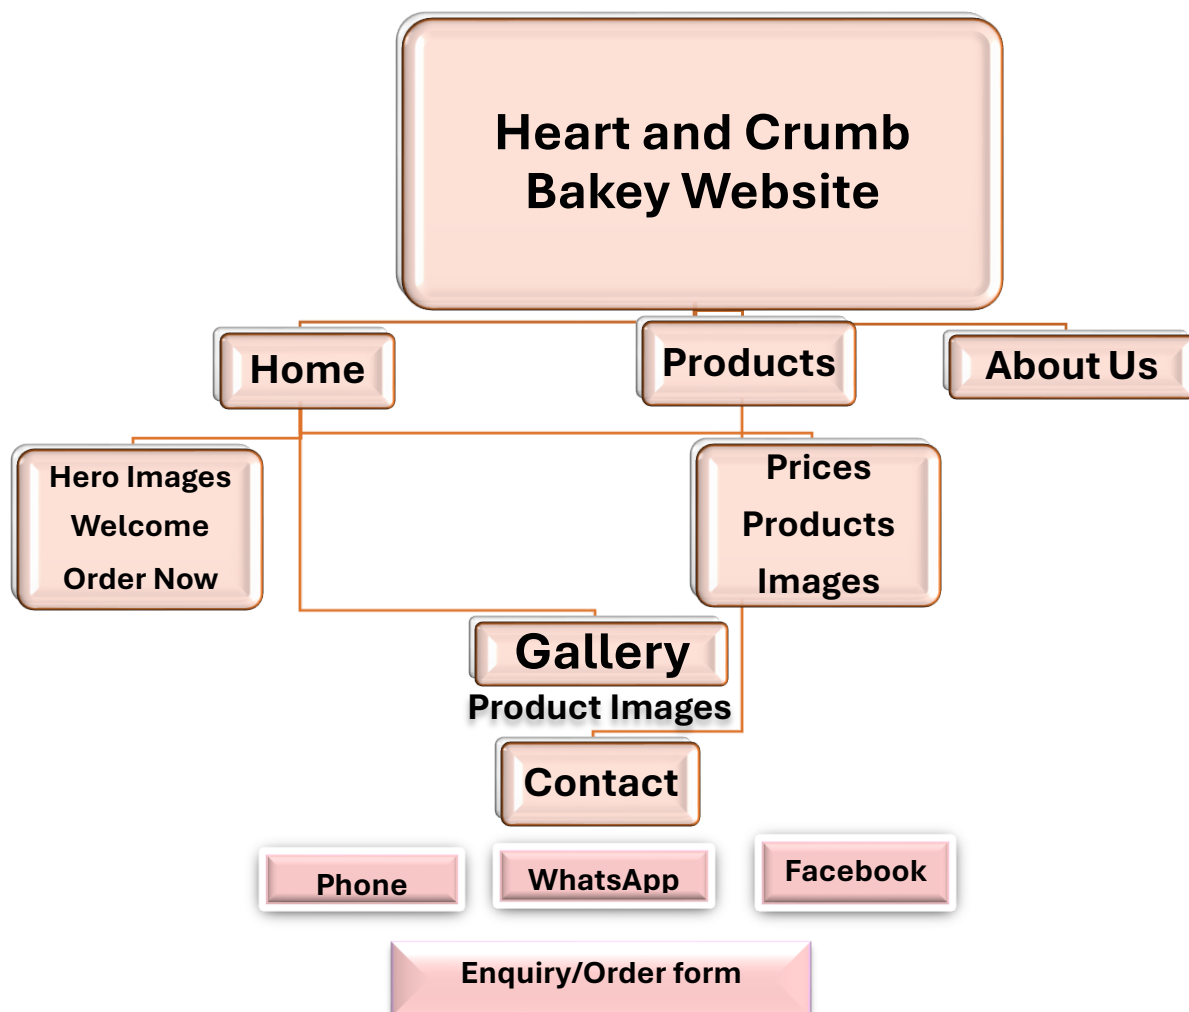

📄 **About Us-** Share bakery history and values of using locally sourced ingredients.

-  **Contact page-** Provide the bakery's contact details like numbers, emails, location and links to Facebook and WhatsApp
-  **Responsive design-** Ensure that the website works well on phones, tablets and computers
-  **Search navigation-** Provide simple menus and buttons for customers to quickly find information they want.

5. Design and User experience

Overall aesthetic and branding

-  **Colour Scheme:** Warm colours such as pink, brown and cream will be used to create a welcoming bakery feel.
-  **Typography:** The use of simple fonts that are easy to read on phones and computers.
-  **Layout and Design:** I will use clean layout that is easy to follow with product images, prices and priorities organised layout.
-  **User experience:** The website will be made easy to use, mobile-friendly and fast. With clear buttons for enquiries and orders. Accessible with readable text, good colour contrast and description for images so it may be accessible to various users

6. Technical Requirements

-  **Hosting:** Heart and Crumb will use WebTech South Africa web hosting. A basic Linux shared-hosting package will be suitable for storing and delivering the website files.

- 🍪 **Domain:** heartandcrumb.co.za. the **.co.za** extension appealed appropriately for the bakery is proudly operated in a small town from South Africa. `
- 🍪 **Programming language:** HTML5,CSS3 and JavaScript will be used to develop the website and the development tool to organise and write the website code will be Visual Studio Code.
- 🍪 **Framework:** Bootstrap may also be used to assist with responsive design and ensure the website works on computers and mobile phones.

7. Timeline and Milestones

Week	Planned Activity
Week 1	Research and gather information about Heart and Crumb Bakery
Week 2	Write proposal for the website and include the fidelity wireframe
Week 3	Present the proposal for the approvment of the website
Week 4	Develop the HTML pages in Visual studio code add CSS styling images and responsive design
Week 5	Add JavaScript, form and test the website
Week 6	Correct any mistakes and submit the completed website

8. Budget
