Website Proposal

YOUTH HOPE SUPPORT FOUNDATION

1. Organisation Overview

Name of organisations

- ✚ The targeted organisation for this website is non-profit organisation called Youth Hope Support Foundation.

Brief history of the organisation

- ✚ Youth Hope Support was established to support young people who happen to experience emotional, social and personal issues. It aims to create a warm environment that makes them feel safe and supported by providing them with access to information guidance and appropriate support from **professional psychologies**.

Mission

- ✚ To provide young people with a safe, supportive and non-judgmental environment where they can access useful information and guidance to improve their emotional well-being.

Vision

- ✚ Create a community of safety, vulnerability where every young person feels supported, valued and comfortable seeking help when experiencing any challenges.

Target Audience

- ✚ Teenagers and young adults
- ✚ Parents and guardians looking for support for young people
- ✚ Schools, youth groups and organisations.
- ✚ Volunteers and people interested in supporting the youth with emotional wellness

2. Website Goals and Objectives

Website Goals

- ✚ The main goal of the website is to provide young people with an easy and accessible platform where they can learn about psychological and emotional well-being .
- ✚ Find information about support services offered by the organisation.
- ✚ Help the target audience to contact the organisation and learn how they can access or support its services.

Key Performance Indicators

- ✚ Online enquiries: Monitor the number of enquiries received through the website to determine whether visitors are using available contact and support options
- ✚ User Engagement: Monitor how long the visitors spend on the website and which pages they visit most frequently.

- ✚ Community Participation: Measure the number of volunteers, donors and community members who become involved with the organisation through the website.

3. Current Website Analysis

Existing online presence

- ✚ Youth Hope Support Foundation currently has limited online presence as it relies mainly on social media platforms and direct communication to share any information.

Platforms	Strengths	Weaknesses
Facebook	Allows the organisation to share information awareness campaigns and events with a large audience	Important can become difficult to access as new posts are added
WhatsApp	Provides quick and direct communication between the young people and the organisation	Information, support resources and contact details may not be professionally organised in one central location

Areas for improvement

- ✚ A dedicated website would provide one central information where young people can access information about psychological and emotional well-being.
- ✚ The website would allow visitors to find information about the organisation, available support services, educational resources, events and more ways to contact the organisation.
- ✚ It would provide a more professional presence and make it easier for the audience to find the organisation through search engine.

4. Proposed Website and functionalities

The website will contain several features designed to make information and support easily accessible.

- ✚ **Homepage:** the homepage will introduce the Youth Hope Support Foundation and explain its purpose. Include a welcoming message, information about the organisation and clear buttons directing visitors to support, resources and contact information.
- ✚ **About Us:** it will provide information about the organisation's history, mission, visions and values.
- ✚ **Supports services:** this section will explain different types of support that are available.
- ✚ **Mental and emotional well-being Resources:** Provide educational resources covering topics relevant to young people such as Managing stress and dealing with academic pressure and more.

- ✚ **Online enquiry:** will allow visitors to contact the organisation with general questions or certain requests. This Form will collect information that is necessary and include privacy in how the submitted information is to be handled.
- ✚ **Events and Program:** The website will display upcoming workshops, events awareness campaigns, youth programs organised by the organisation.
- ✚ **Volunteers and Donors:** a volunteer page will provide information about how people can volunteer their time and skills to support the organisation along with a donation section that will explain how individuals can financially support the non-profit organisation and its programs.
- ✚ **Contact Page:** the contact page will contain contact information.
- ✚ **Emergency and Immediate Support Information:** A clearly visible section will direct visitors who seek immediate crisis to professional or emergency support services.
- ✚ **Responsive Design:** The website will be responsive so that it works effectively on smartphones, tablets and desktop computers.
- ✚ **Search and Navigation:** Simple menus, search functionality and clearly labelled buttons will allow users to quickly find the information they need.
- ✚ **Accessibility:** The website will use readable text, suitable colour contrasts, alternative text for images and simple navigation to make the website accessible to as many users as possible.

5. Design and User Experience

Overall Aesthetic and Branding

The website will have a welcoming, calm and professional appearance. The design will aim to make young visitors feel comfortable and supported when accessing the website.

- ✚ **Colour Scheme:** Soft and calming colours such as **blue, green, white** and **purple** may be used to create a peaceful and welcoming atmosphere.
- ✚ **Typography:** Simple, modern and readable fonts will be used. The font size and spacing will be suitable for both mobile devices and computers.
- ✚ **Layout and Design:** The website will use a clean and organised layout with clear headings, images and buttons.
- ✚ **User Experience:** The website will avoid overwhelming visitors with large amounts of information on one page. Content will be divided into clear sections so that users can quickly find the information they need.

6. Technical Requirements

- ✚ **Hosting:** The organisation will use a reliable web-hosting provider like WebTech . A basic Linux shared-hosting package may be suitable for storing and delivering the website files.
- ✚ **Domain:** A suitable domain name could be **youthhopesupport.co.za**. The .co.za extension would be appropriate because the organisation operates in South Africa.
- ✚ **Programming Languages:**
 - HTML5** – to create the structure and content of the website.
 - CSS3** – to control the appearance and layout of the website.
 - JavaScript** – to provide interactive features and functionality.
- ✚ **Development Tool:** **Visual Studio Code** will be used to write, organise and manage the website code.
- ✚ **Framework:** Bootstrap may be used to assist with responsive design and ensure that the website works effectively on smartphones, tablets and computers.
- ✚ **Security and Privacy:** Because the organisation deals with young people and potentially sensitive enquiries, privacy and security will be important considerations.

7. Timeline and Milestones

Week	Planned Activity
Week 1	Researching the organisation, target audience and psychological supports needs of young people.
Week 2	Write proposal for the website and create a low fidelity wireframe
Week 3	Present the proposal for the approval of the website
Week 4	Develop the HTML pages in Visual studio code add CSS styling images and responsive design
Week 5	Add JavaScript, form and test the website
Week 6	Correct any mistakes and submit the completed website

8. Estimated first year cost of developing and maintaining the Youth Hope Support Foundation website is: **R6950**

Website development: R4000

Domain name: R250 per year

Web hosting: R1200 per year

Maintenance and Updates: R1500 per year
